Philosophy behind the 'Red Pigeon' and 'Red Bird' products.

Natural and **concentrated products** that are truly effective. The Red Pigeon / Red Bird range of products consists of natural products with maximum effectiveness and the **highest quality ingredients**. The approach to the Red Pigeon and Red Bird range of products is highly scientific. The products are efficient and the difference in **the results is evident**. In 'Betachol', for example, real vitamin B12 is used as the colour, rather than a chemical substance. We also avoid the use of sugar where possible, as it often does not interact well with herbs. Our best publicity is a satisfied customer!

Knowledge of plants combined with a scientific background.

The product range was developed in **conjunction with a laboratory** that has specialised in herbs and plants for more than 25 years. Their valuable knowledge and experience have specifically contributed to the development of this product range: products based on essential oils and herbs, developed by true specialists. Our products are highly concentrated and contain no artificial colours!

Avoid antibiotics.

For a number of years we have been noticing that the use of **antibiotics is becoming less and less effective**. The mass use of antibiotics in the past is causing increasing resistance in bacteria and viruses. This is a vicious circle and it is time to take a responsible approach.

Natural methods to increase immunity and resistance against illnesses.

One way to avoid antibiotics is to increase the natural resistance of your birds. Take a look at people: why take antibiotics if you are not ill... That simply makes no sense.

The basis of our resistance is our food. A well-balanced and varied diet increases our resistance. The various herbs and plants provide us with a lot of alternatives that are effective and non-harmful. The older generation has known about these benefits for a long time. By enhancing immunity we address problems before they occur.

PURIFIX 250ml – 1000ml (immunity- resistance – for healthy pink skin)

PURIFIX contains a large range of herbs like Vaccinium, Trigonella, Curcuma and Astragalus.

- Vaccinium: purifying and good for the joints;
- Trigonella: improves digestion;
- Curcuma: antioxidant, aids digestion;
- Astragalus: enhances the overall resistance of the birds.

Purifix is the basis of the Red Pigeon and Red Bird products. It purifies the body, enhances immunity and resistance and therefore the overall well-being of your birds.

Administer a 2-3 week course of treatment on a regular basis (every 2 to 3 months). In between treatment courses continue to give Purifix twice a week. After all, immunity is not built up in just a few days! This is a point for attention throughout the year and will have long-term benefits. Purifix promotes healthy, pink skin.

Dose: 15 ml / litre of water.

Nutritional supplement for pigeons or ornamental birds.

Spijvertering, weerstand, zuiverend
Digestion, resistance, purification
Digestion, resistance, purgative

PURIFIX

COX 250ml - 500ml (digestion)

COX is based on a number of different herbs like Thyme, Oregano and Garlic.

- Thyme: excellent for the respiratory tract;
- Oregano: enhances immunity and resistance, aids digestion;
- Garlic: has a strong cleansing effect.

COX is a very effective aid for digestive problems. Give twice a week or a 5-day course of treatment. Loose droppings will improve after just a few days. You can also administer a 5-day course of treatment after weaning young pigeons or for two days after pigeons return from flying a competition.

Dose: 15 ml / litre of water.

Nutritional supplement for pigeons or ornamental birds.

Bevordert de darmwerking
Favorise la digestion
Improves digestion

COX

BRONX 250ml - 500ml (respiratory tract)

BRONX contains a large number of herbs, including Echinacea, Eucalyptus and Mint.

- Echinacea: excellent for the respiratory tract;
- Pimpinella Anisum: will significantly improve digestion;
- Eucalyptus: beneficial for the respiratory tract;
- Mentha Piperita: highly effective against mucous.

Bronx will improve respiration. Give twice a week, or administer a 5-day course of treatment. Extremely important at the change of seasons or in the case of large temperature fluctuations.

Dose: 15 ml / litre of water.

Nutritional supplement for pigeons or ornamental birds.

Goed voor de bovenste luchtwegen
Améliore le système respiratoire
Improves the respiratory system

BRONX

ROYAL TEA 250ml - 1000ml (overall condition)

ROYAL TEA is a blend that contains a large number of herbs and essential oils as well as a number of natural, organic acids.

- Urtica: cleansing and purifying;
- Cinnamomum: enhances immunity, aids digestion;
- Astragalus: enhances the overall resistance;
- Smilax: aids digestion and has a cleansing effect.

ROYAL TEA aids digestion and is beneficial for the respiratory tract. The formula, which contains organic acids, guarantees healthy, firm droppings.

Use ROYAL TEA twice a week throughout the year, or administer a 5-day course of treatment.

Dose: 10 - 15 ml / litre of water.

Nutritional supplement for pigeons or ornamental birds.

Bevordert de algemene conditie
Améliore la condition générale
Improves general condition

ROYAL TEA

Cinnamomum

BETACHOL 500ml - 1000ml (cleansing + vit B12)

BETACHOL contains, among other things, methionine, choline, betaine, vitamin B12, vitamin C and specific herbs that promote cleansing.

- Methionine, choline and betaine: purifying effect;
- Vitamin B12: excellent for healthy and shiny feathers.

BETACHOL is perfect for effective internal cleansing. Highly effective during moulting period and after high-stress situations. The red colour of this formula is due to an extremely high concentration of vitamin B12 (50mg per litre, one of the highest concentrations available). Give twice a week or administer a course of treatment of 5-7 days.

Dose: 10 ml / litre of water or per kilo of grain.

Nutritional supplement for pigeons.

Premium oil 250ml - 500ml - 1000ml (health-promoting oil and energy)

PREMIUM OIL is a blend of corn germ oil and essential oils of the highest quality. When using PREMIUM OIL you will not need to use any other oils.

Corn germ oil is high in vitamin E, has a pleasant flavour and is easy to digest. Essential garlic oil provides a cleansing effect. Essential thyme oil has a very beneficial effect on the respiratory tract.

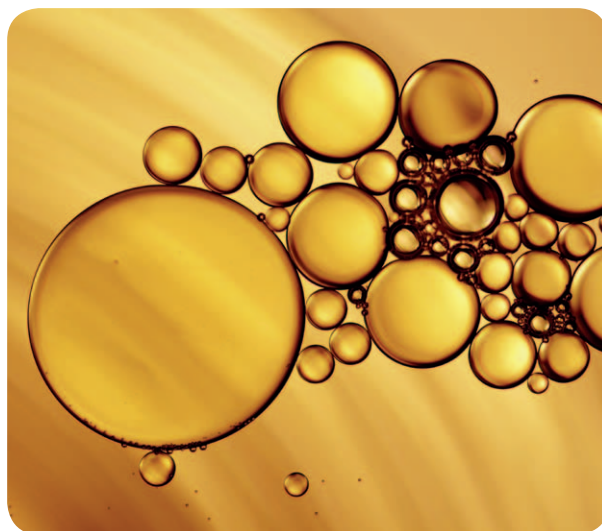

Use PREMIUM OIL:

- To prepare birds for breeding, 8 days before putting birds together; also in the growth stages of young pigeons;
- After competitions PREMIUM OIL may be mixed with GALAXY for a period of 2 days. PREMIUM OIL provides sufficient fat reserves and GALAXY protects the pigeons against external attacks;
- To prepare for competition; give PREMIUM OIL for 2-3 days before basketting. This will increase your pigeons' energy reserves, especially before mid-distance and long-distance flights.

Use GALAXY on Wednesday and Thursday, for example, to prevent problems during transport. Add vitamin supplements to the drinking water.

Dose: 1 tablespoon (15ml) per kg of feed.

Nutritional supplement for pigeons.

Metabolyt 500ml (yeasts)

METABOLYT is a nutritional compound of yeast culture and yeast cell walls. It has an instant, positive effect on digestion and on overall animal health. In the case of loose droppings use METABOLYT for a number of days. METABOLYT will aid rapid improvement. Occasionally the droppings may be slightly thinner when first using this product; this indicates that cleansing of the digestive tract is in progress. Droppings will return to normal after 1-2 days.

METABOLYT can be used on a regular basis, once or twice a week. It is important to use METABOLYT after weaning young pigeons and after competitions, as it will help avoid a lot of problems. METABOLYT can easily be mixed in with the feed without wasting product.

Dose: 15 ml per kg of feed.

Nutritional supplement for pigeons.

De kracht van levende gist
La force des levures vivantes
The power of live yeast

METABOLYT

Galaxy 300gr (immunity and resistance)

GALAXY is a powder that is composed of various essential oils in a base of silica and green clay.

- Essential thyme oil: beneficial to the respiratory tract;
- Essential oregano oil: enhances immunity and resistance;
- Essential cinnamon oil: benefits digestion;
- Green clay: deep-cleansing of the body;
- + other essential oils.

GALAXY is a revolutionary product. It is a blend of essential oils in a base of green clay. Each essential oil has a specific effect, which means the product is broadly beneficial. It aids digestion, is beneficial to the respiratory tract and has a cleansing effect. A 5-day course of treatment, for example, will clear the pigeon's nose and avoid head problems. Green clay is also frequently used because of its purifying effect. Galaxy will quickly deliver visible results.

GALAXY also provides protection against external attacks. Use GALAXY together with PREMIUM OIL once or twice a week or as a 5-day course of treatment for in-depth cleansing. Highly recommended on the Monday and Tuesday after a competition.

Dose: 1 tablespoon per kg of feed or mixed with PREMIUM OIL for use in the feed.

Nutritional supplement for pigeons.

Digest 1000ml (organic acids)

DIGEST is a blend of 4 organic acids:

- Propionic acid;
- Lactic acid;
- Acetic acid;
- Lactic acid.

Promotes good digestion and can be used to acidify the drinking water. Also improves the quality of the drinking water. A special component of this formula is lactic acid, which will remain active even at a higher pH. This can prevent a host of problems. The droppings will always be homogeneous.

DIGEST can be used 2-3 times a week year-round, and replaces other acidifiers.

Dose: 10 ml / litre of water.

Nutritional supplement for pigeons.

PH control, Goed voor de darmwerking, Waterhygiëne.
Contrôle du PH, Digestion optimale, Hygiène de l'eau.
PH control, optimal digestion, Water disinfection.

DIGEST

Color-red 300gr (intensive red with choline)

COLOR-RED contains Carophyll red, Beta-carotene, Niacin, Vitamin B2, B9 and especially Choline, to support bodies heavily burdened by the consumption of concentrated colourants.

Dose: 10 g per kilo of egg food or per litre of water.

Nutritional supplement for ornamental birds.

Spirulina 300gr (proteins)

Spirulina is a natural green algae with a protein content of more than 55%. It contains large quantities of oligo elements and amino acids. Because of its exceptional qualities Spirulina is also frequently used in the human sector. Particularly interesting for young birds and to fix colours.

Dose: 1 teaspoon per kg of feed.

Nutritional supplement for ornamental birds.

POUSTOP 300gr (to combat fleas and lice) - NEW

POUSTOP is a 100% natural product based on aromatic substances, so there are no disadvantages associated with the use of this product. POUSTOP protects against fleas and lice. POUSTOP can be mixed into the feed or sprinkled under the nests.

Dose: 2 teaspoons per kilo of feed. (3 to 4-day course of treatment). In case of infestation, for 2 weeks.

Nutritional supplement for pigeons.

Multimix Katanga 2.5L (minerals)

MULTIMIX BIRD is a blend of redstone, oyster grit, sea algae, charcoal, mineral powder, health-promoting seeds and more. It promotes strong eggshells and improves digestion. The birds love it!

Dose: make freely available throughout the year in a separate food bowl.

Nutritional supplement for ornamental birds.

Blansec 2.5kg (combats humidity)

Sprinkle under the material at the base of the cage (sand, ground corn cobs, wood chips) to prevent excess humidity in cages or aviaries. Contains eucalyptus and camphor, which are beneficial to the respiratory tract.

Dose: a few tablespoons, depending on the size of the cage or aviary; spread out with a brush. Completely harmless, even if BLANSEC is eaten by the birds.

Schedule for the use of Red Pigeon and Red Bird

We don't believe in giving you a complex schedule incorporating all the products, obliging you to give several products every day. It is up to the fancier to decide when he considers the use of a certain product appropriate. By carefully observing the flock the right products can be chosen and used depending on the situation.

With our product range we aim to **improve the overall health of your birds** rather than supplement excessively. A healthy animal is capable of extracting adequate nutrients and vitamins from good feed. However, supplements may be beneficial during specific critical periods.

Following are some suggestions for the use of our products:

- Administer a course of PURIFIX on a regular basis, especially in preparation for breeding, at the start of the moulting period, when weaning young birds, before competitions (pigeons), before exhibitions (birds) or whenever you notice a deterioration in the overall condition.
- Use COX and BRONX once a week or administer a 5-day course of treatment if you notice problems.
- For total cleansing use GALAXY; you can also give this for 2 days after the pigeon returns from a competition, in combination with PREMIUM OIL.
- Give METABOLYT to restore digestion and DIGEST or ROYAL TEA for healthy droppings.
- BETACHOL is ideal during moulting period or after a course of antibiotics.

Try 1 or 2 products from our product range and we have no doubt you will quickly be convinced!

You will find our complete range of products for pigeons and birds on our website www.red-pigeon.com. We can supply anywhere in Europe and globally via Postpakket (package mail).
